

**Flat suction submersible drainage pump with automatic level sensor for flood protection**

**Chromatic C240 WF Sensoflat, C270 WF Sensoflat**

**Application**

Pump for conveying clean or lightly soiled water.  
Automatic extraction from water levels of just 5 mm to prevent severe flooding in rooms without pump sump or floor drain, e.g. through flooding cloud-burst, burst pipes or defective washing machines. Emergency deployment for flooding. A cooling jacket with discharge connector at the top ensures sufficient motor cooling even at low water level (sip operation). The sensor switch automatically switches the pump on at a water level of just 5 mm. Residual water is pumped off down to 2 mm.

**Installation:** Stationary or mobile.

**Pumped medium:** Clear- or drainage water containing solids up to 3 mm particle size. Max. temperature of pumped medium: 35°C, for brief periods up to 60°C.

**Operating mode:** C240: Continuous operation (S1), at medium temperature 36- 60°C: Intermittent operation (S3 30%).

C270: Intermittent operation.

**Design**

Submersible pump, consisting of:

**Pump:** Single-stage centrifugal pump with vertical discharge.

**Impeller:** Open multi-blade impeller, free passage C240: 3 mm, C270: 2 mm

**Motor:** Pressure watertight, medium-immersed motor. Stainless steel motor housing. Insulation class B, Protection rating IPX8. Thermal sensor for temperature monitoring in the winding.

**Shaft/bearing:** strongly dimensioned chrome steel motor shaft, lifetime-lubricated roller bearings.

**Seal:** C240: Shaft seal with triple radial shaft seal and ceramic-coated sealing surfaces.

C270: Combination of axial shaft seal and radial shaft seal.
